ASSIST stands for Articulation System Stimulating Interinstitutional Student Transfer. This system displays reports of how credits earned at a California Community College transfer to a California public 4 year university such as UCD.

How to use Assist:

1) Go to the Assist homepage at [http://www.assist.org/](http://www.assist.org/)
2) Click on the pull-down menu “Click here to select an institution.” Scroll down to the community college you are trying to transfer units from. You can type the first letter of the community college to move down the menu faster.
3) Select the appropriate year when you took or plan to take the course.
4) Click on the pull-down menu “Click here to select a campus.” Scroll down to “To: University of California, Davis.”
5) You can now select the way you want the classes to be listed.

The most common options are:

1) **By Major**: This option shows all courses transferable for the selected major and whether there is an articulated equivalent
2) **By Department**: This option shows whether there are articulated equivalents based on the department. You may view these courses by UCD major department and/or the community college major department.
3) **For General Education/Breadth**: This option shows the entire list of UCD courses and whether or not the community college has an articulated equivalent. GE: TB AH, SS, or SE stands for Topical Breadth Arts & Humanities, Social Science and Science & Engineering. The D stands for Social-Cultural Diversity and the W stands for the Writing Experience.

6) The results will be listed in 2 columns. UCD courses will be displayed on the left and the equivalent community college course will be on the right.

* To see if courses transfer even if there are not articulated equivalents, you may click on “UC Transferable Courses” followed by the major department of that course to ensure that you will receive elective units towards your degree.

*Note*: 1 semester unit = 1.5 quarter units. A 3 unit semester course therefore is equivalent to 4.5 quarter units.
